

Acme Cloud — Q3 2026 Business Review

Executive summary

Total Q3 revenue reached **USD 2.66M**, up 18% quarter on quarter and 41% year on year. Growth was led by new-logo acquisition in APAC and by expansion within the existing EMEA base, which delivered the strongest net revenue retention of any region at **112%**. The Enterprise segment is 48% of revenue despite the smallest unit volume. Gross margin held at 79%; cash runway is 21 months. Two items need board attention: LATAM pipeline coverage is 1.9x against a 3.0x target, and support CSAT dipped to 4.1.

Headline metrics

Metric	Q3 2026	Q2 2026	Q3 2025	QoQ	YoY	Plan
Revenue (USD M)	2.66	2.25	1.89	+18%	+41%	2.55

Revenue detail

Revenue by region — all products (USD)

Region	Q3 rev	Q2 rev	QoQ	New logos	Churned	NRR
North America	996,000	889,000	+12%	184	41	104%
EMEA	714,000	655,000	+9%	135	24	112%
APAC	540,000	403,000	+34%	251	58	108%
LATAM	210,000	198,000	+6%	42	16	99%
Total (product)	2,460,000	2,145,000	+15%	612	139	106%

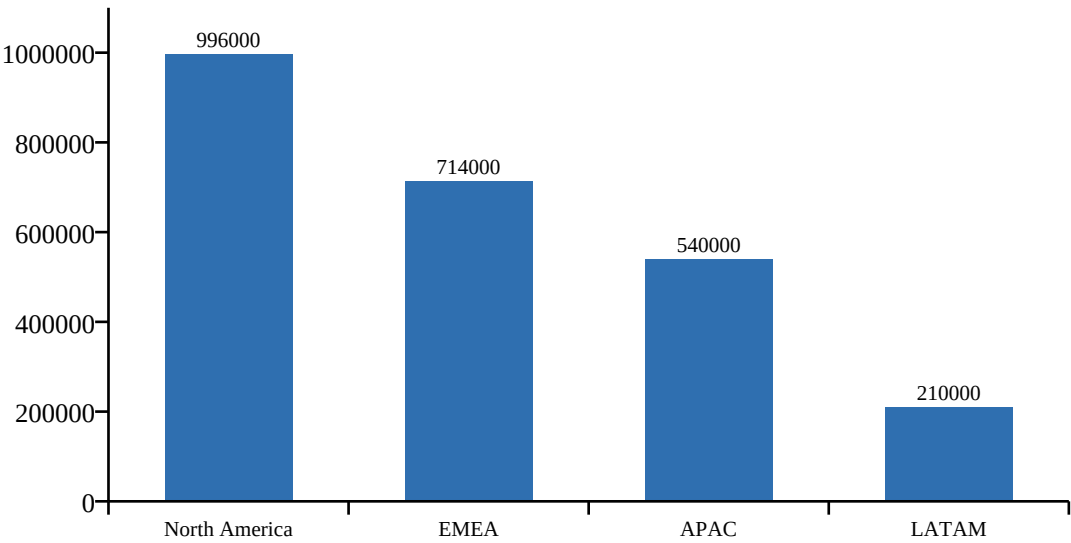

Product revenue (2.46M) plus professional services (0.14M) and marketplace revenue share (0.06M) gives the 2.66M total.

Revenue by segment

Segment	Q3 revenue	Share	Customers	ARPA (USD)	Gross churn
Enterprise	1,276,800	48%	99	12,897	0.8%
Team	930,000	35%	1,240	750	1.6%
Starter	452,200	17%	8,900	51	2.9%

Q3 revenue by region (chart)

Q3 2026 product revenue by region (USD)

The chart above plots Q3 2026 product revenue for each region. North America is the largest at USD 996,000 and LATAM the smallest at USD 210,000; the four regions sum to the USD 2,460,000 product-revenue total. APAC grew fastest quarter on quarter (+34%).

Customers and support

New logos were 612 for the quarter (APAC 41%, NA 30%, EMEA 22%, LATAM 7%). Gross revenue churn was 1.4%; net was strongly positive on EMEA expansion.

Support metrics

Metric	Jul	Aug	Sep	Q3	Target
Median first response	2h40m	2h18m	2h14m	2h24m	3h00m
Median full resolution	2.1d	1.9d	1.8d	1.9d	2.0d
Tickets created	3,180	3,140	3,092	9,412	-
Backlog at month end	78	71	63	63	< 80
CSAT	3.9	4.1	4.2	4.1	4.4

Reliability, risks and outlook

API availability was 99.94% against a 99.9% SLO. One Sev-1 incident: on 2026-03-09 an EMEA deploy set the database connection-pool ceiling to 20 instead of 200, causing a 47-minute partial outage in EMEA only. Root cause and six action items are in the postmortem.

Key risks

Risk	Likelihood	Impact	Severity	Owner	Due
LATAM pipeline coverage 1.9x vs 3.0x	High	High	High	Sales	Q4
Support CSAT 4.1 below 4.4 floor	High	Medium	High	Support	Q4
Two senior Eng roles open 90+ days	Medium	Medium	Medium	Eng	Nov
FX exposure on EUR/GBP contracts	Medium	Low	Low	Finance	ongoing

Q4 priorities: (1) close the LATAM pipeline gap with a partner motion, (2) staff support to plan and recover CSAT to 4.4+, (3) ship EU data residency GA for Enterprise, (4) hold gross margin at 79% or better.
